

# TJ Bumpstop Extension Kit

www.teraflex.com

Kit #1910234 Front Lower for 3"-4" Lift  
Kit #1910111 Rear Upper for 3" Lift  
Kit #1910204 Rear Upper for 4" Lift

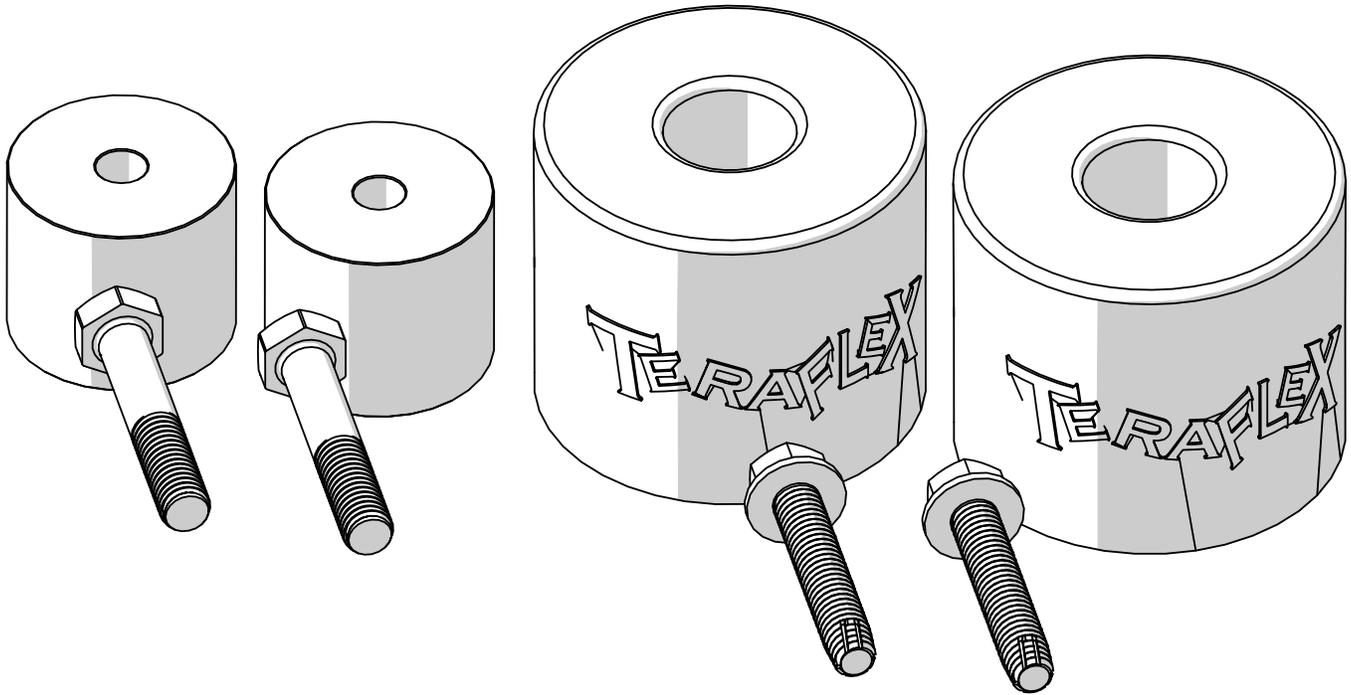

## Important Notes:

Prior to beginning this or any installation read these instructions to familiarize yourself with the required steps and evaluate if you are experienced and capable to personally perform these modifications. A factory service manual should be used in conjunction with these installation instructions.

Refer to the parts list to ensure that all necessary components and hardware has been included. If any parts are missing please contact your local TeraFlex dealer for assistance.

## Tools needed:

- This installation guide
- Basic mechanics tool set

## Parts List: 3"-4" Front Lower Bumpstop Kit #1910234

Item Number	Part Number	Description	Quantity
1	31	Bolt 3/8"-16 Self Tapping Flanged Hex Head	2
2	4671111	JK/TJ Front Lower 2.25" Raised Bumpstop Pad	2

## Parts List: 3" Rear Upper Bumpstop Kit #1910111

Item Number	Part Number	Description	Quantity
3	25	Bolt M10x1.5x55mm Hex Head	2
4	399	Universal 1.5" Aluminum Bumpstop Extension	2

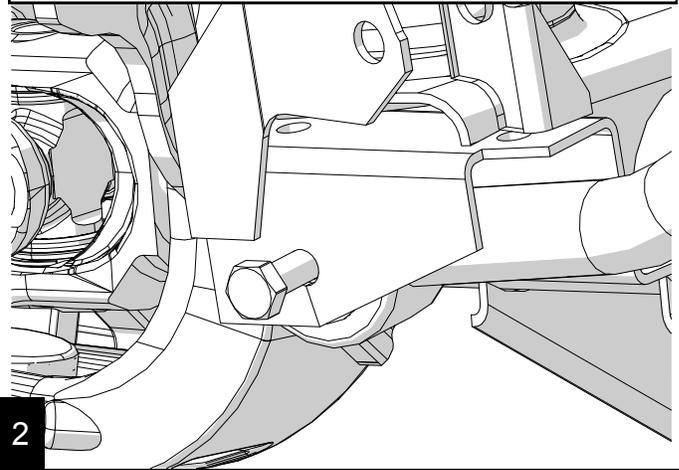

## Parts List: 4" Rear Upper Bumpstop Kit #1910204

Item Number	Part Number	Description	Quantity
3	161	Bolt M10x1.5x75mm Hex Head	2
4	468	TJ Rear Upper 2.25" Pumpstop Extension	2

# FRONT INSTALLATION

Park the vehicle on a level surface and set the parking brake. Raise the vehicle and support the frame to allow axle droop. Remove both front wheels and tires.

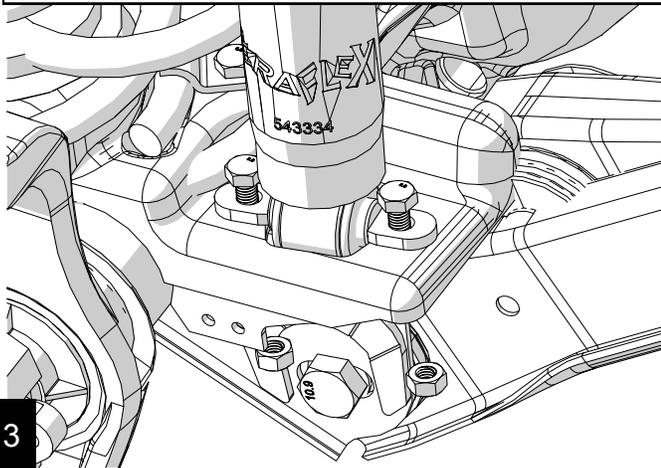

Remove the front track bar at the axle. (See Front Track Bar/ Removal 999103)

1

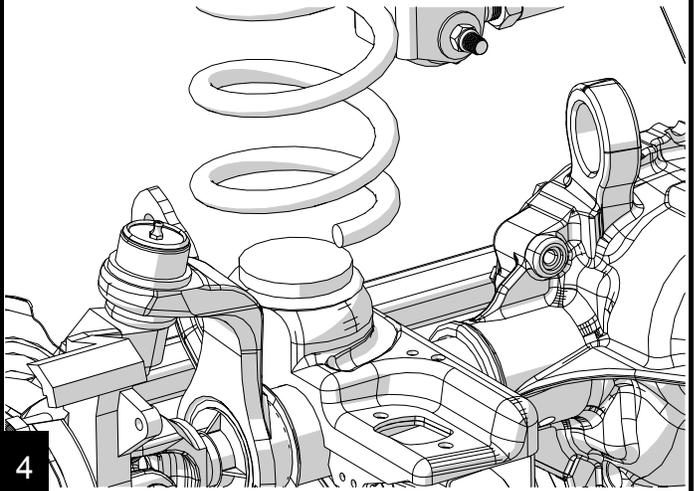

2

Remove the shocks at the axle. (See Shocks/Front Removal 999188)

3

Remove the springs. (See Springs/ Front Removal 999187)

4

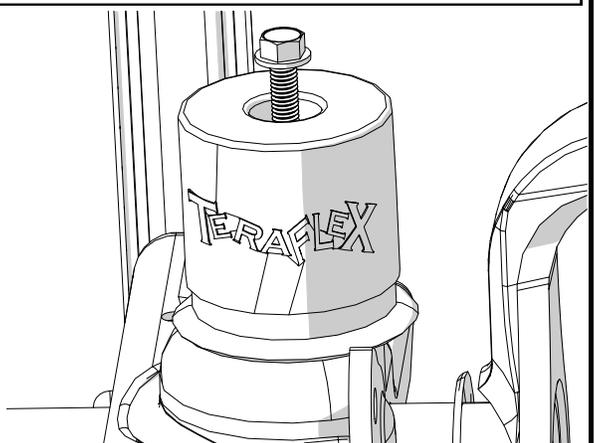

Using the center divot in the spring pad as a guid, drill a 5/16" hole. If necessary, remove the upper bumpstop to access the 15mm bumpstop bell retainer bolt. This will help gain drill access.

Using the spacer as a guide, install one of the self tapping bolts to cut the threads. After the threads are cut, remove the bolt and spacer. (03+ models require a regular tap, 3/8-16)

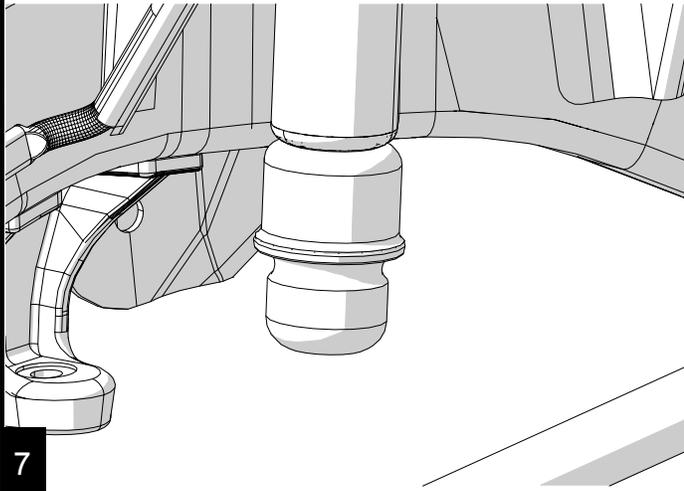

5

6

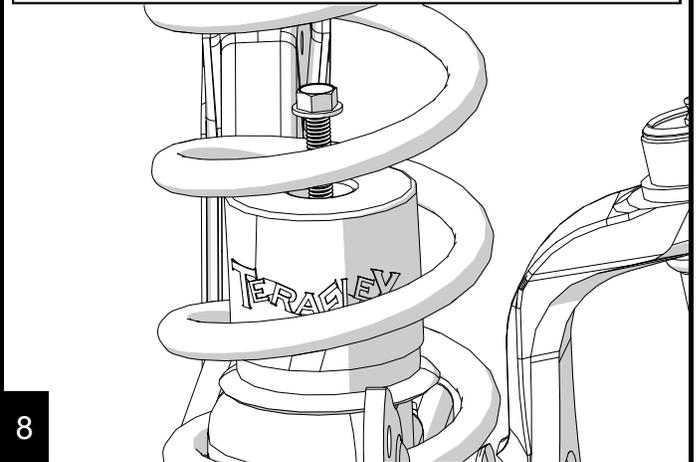

Reinstall bumpstop and cup if removed.

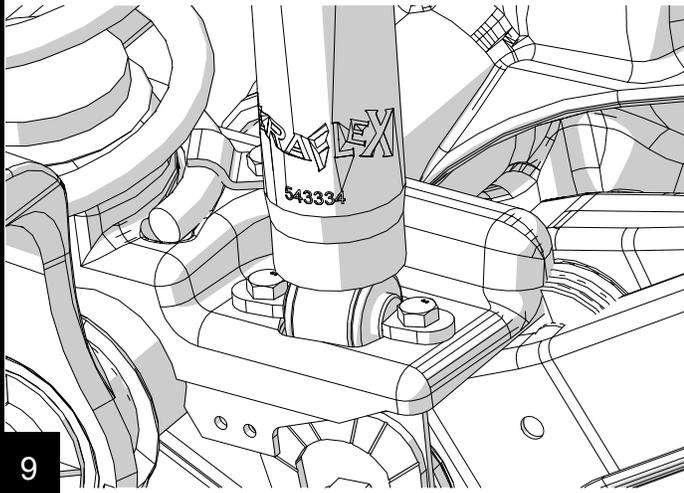

7

Install the spring and loose spacer as an assembly. Reinstall the new spacer retainer bolt.

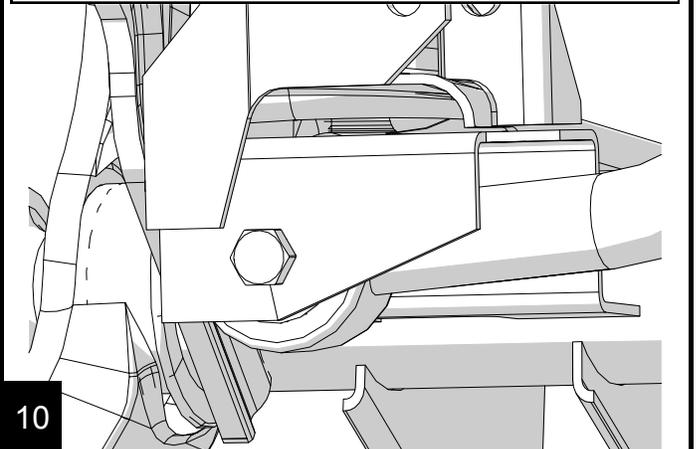

8

Reinstall the shocks. (See Shocks/Front Install 999188)

9

Reinstall the wheels and tires. Torque lug nuts to 110 ft-lbs. Set the vehicle on the ground. Reinstall the front track bar. (See Front Track Bar/ Installation 999103)

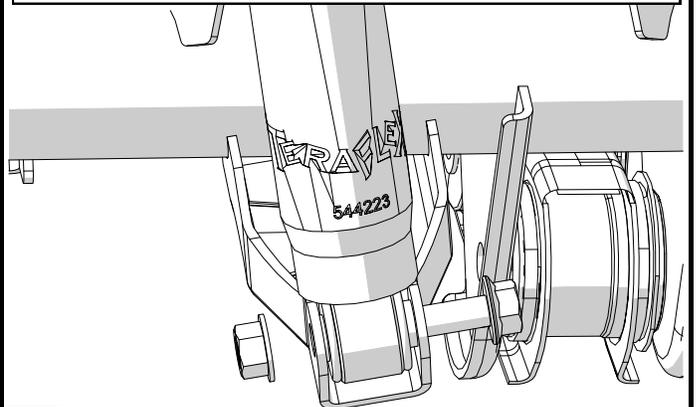

10

## REAR INSTALLATION

Raise the vehicle and support the frame to allow axle droop. Remove both rear wheels and tires.

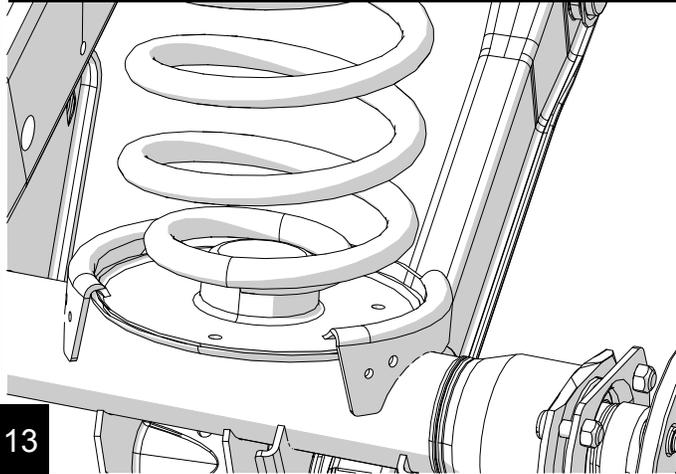

11

Remove the shocks at the axle. (See Shocks/ Rear Removal 999188)

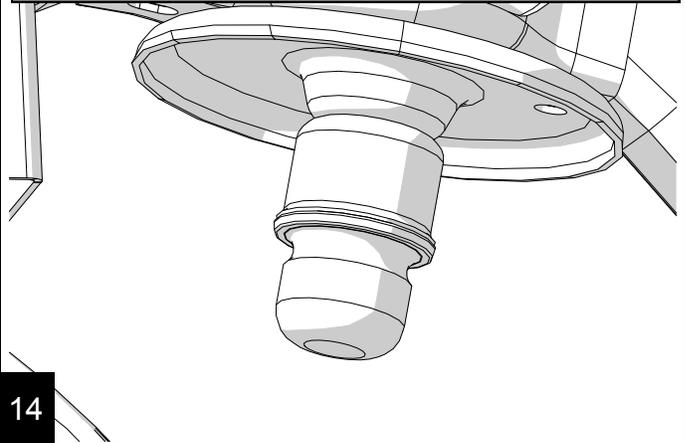

12

Remove the rear springs. (See Springs/ Rear Removal 999187)

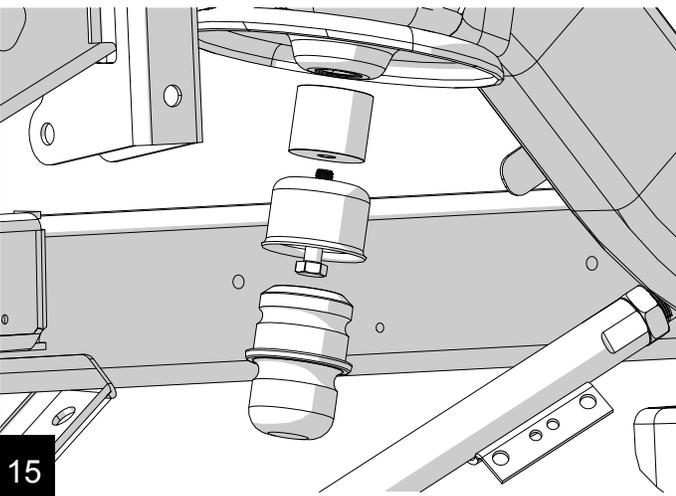

13

Remove the bumpstop by grasping it and working from side to side while pulling down. Remove the cup bolt with a 15mm.

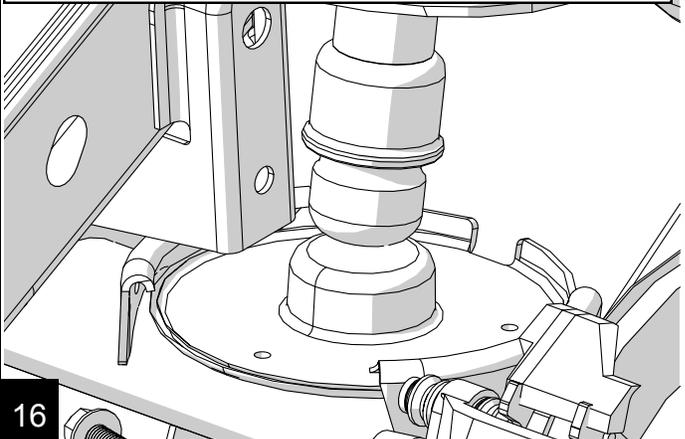

14

Reinstall the cup with the new bolt and spacer.

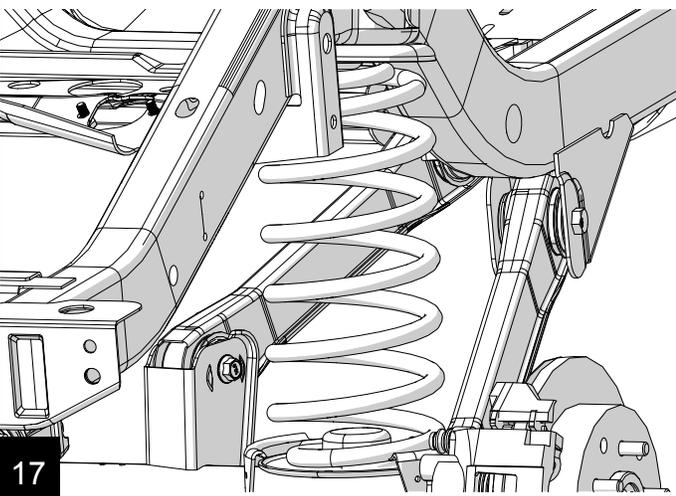

15

Reinstall the bumpstop. A light coating of grease will aid in it's install, or use the axle as a press and push the bumpstop back into place.

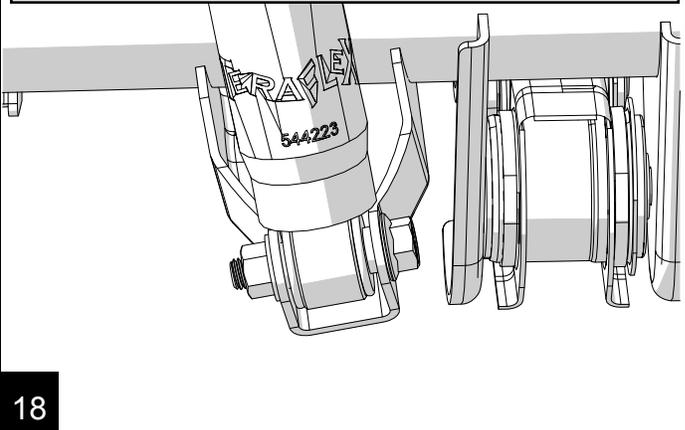

16

Reinstall the springs. (See Springs/Rear Installation 999187)

17

Reinstall the shocks. (See Shocks/Rear Installation 999188)  
Reinstall the wheels and tires, torque to 110 ft-lbs, and set on the ground.

18

## PRODUCT INFORMATION

### MAINTENANCE INFORMATION:

It is the buyer's responsibility to have all suspension, drivetrain, steering, and other components checked for proper tightness and torque after the first 100 miles and every 3000 miles after that.

### NOTICE TO INSTALLER:

The enclosed "Warning to Driver" sticker must be installed in the vehicle in driver's view. This sticker is to act as a constant safety reminder when operating the vehicle. It is your responsibility as the equipment installer to install the provided sticker and to forward the product instructions to the vehicle's owner for review. If a "Warning to Driver" sticker or product installation guide were not included in the kit, FREE replacement stickers and instructions are available by request. It is the installer's duty to ensure a safe and controllable vehicle after the modifications have been performed.

### WARNING:

Neither the seller nor the manufacturer will be liable for any loss, damage, or injury directly or indirectly arising from the use of or inability to determine the use of these products. Before using, the user shall determine the suitability of the products for its intended use, and the user shall assume all responsibility and risk in connection therewith.

### WARNING TO DRIVER:

This vehicle has been modified to enhance off road performance and has unique handling characteristics. Use in harsh environments can cause extreme stress on the components. Vehicle should be inspected after being off road to make sure that all the components are in working order and safe to travel on the highway. All fasteners should be checked so that they are at the correct torque specifications as the vibration and stresses from off roading may cause critical fasteners to work loose. Extra care should be taken to inspect the critical components, steering, and brake systems. During each oil change components such as arms, tie rod ends, etc should be greased and checked for excessive wear. Any worn components should be replaced. When returning to the pavement always set or restore tire air pressure to the factory recommendation and connect or engage any disabled sway bar mechanisms. Because of the higher center of gravity and larger tires, this vehicle handles and reacts differently than many passenger cars, both on and off road. You must drive it safely! Extreme care should be taken to prevent vehicle rollover or loss of control, which can result in serious injury or death. Avoid sudden sharp turns or abrupt maneuvers. Generally, braking performance and capabilities are decreased when significantly larger/heavier tires are used, especially when used in combination with transfer case low-range reduction kits. Take this into consideration while driving. Do not add, alter or fabricate any factory or aftermarket parts to increase vehicle height over the intended height of the TeraFlex product purchased. Mixing component brand is not recommended. TeraFlex Inc. will not be responsible for any altered product or any improper installation or use of our products. We will be happy to answer any questions concerning the design, function, and correct use of our products. It is ultimately the buyer's responsibility to have all bolts/nuts checked for tightness after the first 100 miles and then every 3000 miles. Wheel alignment, steering system, suspension and drive line systems must be inspected by a qualified professional mechanic at least every 3000 miles.

### TERAFLEX PRODUCT WARRANTY:

TeraFlex Inc. warrants TeraFlex Suspension products to the original retail purchaser to be free of defects in material and workmanship for as long as the original purchaser owns the vehicle on which products were originally installed.

Failure to complete regular maintenance (grease every 3000 miles) on TeraFlex FlexArms will void this warranty. All other conditions of the standard TeraFlex product warranty apply.

All TeraLow products are covered by the TeraFlex two (2) year warranty to be free of defects in material and workmanship for two years from date purchased.

TeraFlex axles are covered by a 12-month warranty to be free of defects in materials and workmanship.

This warranty does not cover or include product finish, improperly installed or applied products, improperly maintained products, products or components used for racing or competition or damage due to abuse or neglect, products that fail due to the use of larger tire and wheel combinations.

All returns must be accompanied by an original invoice. It is the customer's responsibility to remove the product from the vehicle. Shipping charges are the responsibility of the customer. TeraFlex Inc. will pay the return freight if the product meets the terms of warranty.

This warranty is for the replacement or repair of defective TeraFlex products only and does not include freight charges, labor charges for removal of or installation of TeraFlex or related products or components, costs incurred due to down time of the vehicle, or lost profits due to vehicle down time.

A returned goods authorization number (RGA#) must accompany any returned products. For more information please contact a TeraFlex customer service representative.
