**Fitment Notes:** This system fits with aFe POWER air intake system P/N's 53-10013R and 53-10013D. It does NOT fit with the factory air intake system. If you are installing on factory intake, please purchase aFe POWER Silver Bullet P/N: 46-32006

1. Disconnect the Intake Air Temperature (IAT) sensor. Loosen and remove air intake tube from the throttle body. Unplug the Throttle Air Control (TAC) harness plug from throttle body.
2. Loosen and remove four throttle body bolts. Remove throttle body. Leave factory-sealing O-ring in place if applicable.
3. Install the aFe POWER Silver Bullet Spacer (AIR IN side towards throttle body) in between the intake and throttle body. Install the furnished gasket between the Silver Bullet Spacer and the throttle body. Use the four longer bolts and washers provided to secure the throttle body to the intake manifold. Tighten the bolts to 10 Nm (89 lb/in).
4. Reconnect TAC harness plug. Reinstall the air intake tube to throttle body. Reconnect the IAT sensor. Your installation is now complete.

**NOTE:** This part has been exempted by the California Air Resources Board (C.A.R.B.) and issued an Executive Order (E.O.). If part does not come with C.A.R.B. E.O. sticker already placed on device, it is necessary to place the sticker on or near the device on a smooth, clean surface. The C.A.R.B. E.O. sticker is required to pass the smog test inspections in the state of California.

### Parts List

- 1 aFe Silver Bullet Spacer
- 1 Gasket
- 4 M6 x 90mm bolts
- 4 M6 lock washers
