

BLADERUNNER[®]

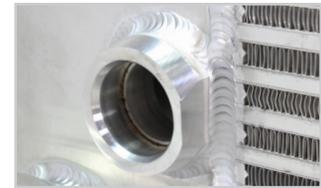

INTERCOOLER

2011-2014 FORD F-150 ECOBOOST
V6-3.5L (tt)

FEATURES & BENEFITS

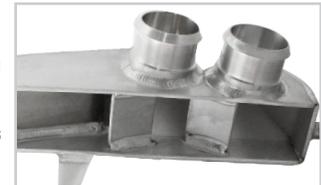

CNC Machined Bypass Flange

A CNC machined bypass flange allows the intercooler to be used on 2013-2014 models that come equipped with an electronic bypass valve. (P/N: 46-20161 only)

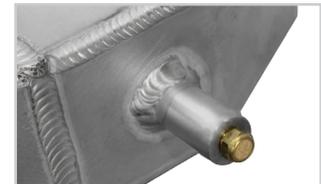

Multi-Directional Vane Technology

The endtanks use the patented BladeRunner MDV technology that directs air flow through the entire intercooler core. This allows for greater cooling than competitor units.

Condensation Drain

The intercooler includes a 1/8" NPT breather vent, which drains water from the intercooler. Port can also be plugged using the included 1/8" NPT plug and drained periodically.

P/N: 46-20121-1
(endtank only)

P/N: 46-20161
(endtank only)

Bar & Plate Design

17°F temperature drop
20% flow increase

P/N	Jobber/Map	Years
46-20121-1	\$995.00	2011-2012
46-20161	\$1,095.00	2013-2014

Price Level "e"

*Legal in California only for racing vehicles which may never be used upon a highway. Prices are subject to change without notice. Last Updated 3-13-2015
